SO99

Name: **Suspension clamp**
4x25-95 mm² (heavy duty with rollers)

Type: SO99

EAN: 6418677405181

Description: Used for the installation and suspension of cables from poles in straight lines and angles. The body is made of hot-dip galvanized steel, and there is a stainless steel reinforced ring in the hook attachment. The integral rollers are made of plastic and inserts of weather resistant plastic. At angles exceeding 30°, the use of an additional roller set is recommended to use with the clamp.

Package: 10/360

Unit: PCS

Technical specification

Electrical values

Test voltage 4 kV / 50 Hz / 1 min

Mechanical

SMFL 18 kN

Tightening torque 12 Nm

Dimensions

Weight 0.825 kg

Conductor size 4x25-95

Conductor diameter 18-39

Use: For the installation and suspension of the 4 core ABC-cables from poles in straight lines and angles.

Construction:	Component	Material
	Body	Hot-dip galvanised steel
	Plastic protection	Frost, heat and UV-radiation resistant plastic
	Rollers	Plastic

Hook attachments are reinforced with a stainless steel ring.

Installation: At angles exceeding 30° the use of an additional roller set ST26.99 is recommended. This unit fits easily onto the SO99 clamp.

Tools required: Articulated spanner ST20.
